Ghosh were picked up from Hanskhali and Chakdaha areas of Nadia, respectively, on February 14. BJP leader Mukul Roy was among those booked in connection with the killing of the MLA. The Calcutta High Court had on February 13 directed the West Bengal police to not arrest Roy, who had quit the Trinamool Congress to join the BJP, till March 7 in connection with the murder case. (PTI)

slated to produce 1,000 coaches. However, between 2011-14, it only did minor work on some coaches brought from Kapurthala. Only 375 coaches were thus refurbished between 2011 to 2014 when it should have been manufacturing coaches completely. Since, 2014 the unit has been a priority area.

In July 2014, MCF was declared a Production Unit of Indian Railways. Within a month it started production of fully formed coaches. Since then it has

be passed on to passengers and will lead to more affordable services. MCF is a shining example of 'Make in India'.

New concepts such as extensive use of Robotics, automation etc. are being implemented in MCF. Rs 480 crore has been sanctioned in Budget 2018-19 for augmentation of production capacity of MCF from 1,000 to around 3,000 coaches per year by 2020-21. New generation safer LHB coaches are being built in MCF - contributing to

'Energy Neutral' standards for the unit and the township. MCF has boosted local economy of Raebareli. It has created employment opportunities for local youth and invigorated industries in vicinity. Goods worth Rs 667 crore were procured from MSMEs in 2018-19. Purchase from local units in Raebareli was less than Rs 1 crore in 2013-14; it has now become Rs. 124 cr in 2018-19. Further, training centers have been developed to provide skill development opportunities to local youth.

Laqshya Media Group launches SHARP

EOI CORRESPONDENT

KOLKATA, FEB 18/--/ Laqshya Media Group (LMG), independent media conglomerate in India, has launched 'SHARP' (Strategic Hyperlocal AI-powered Reach Planner), a first of its kind state-of-the-art planning tool for measuring the effectiveness and media value of Outdoor campaigns. This is India's first ever measuring tool, developed in-house by LMG that allows brands to target the right audiences with Reach or Budget as an objective for an OOH campaign.

Software to measure Reach & other parameters

The OOH tool uses machine learning to deliver AI-optimized metrics and recommendations. The system is fed with data received from more than 50,000 geo-tagged sites comprising of Billboards, BQS sites, Mall facades, Pillars and Poles across 26 cities. SHARP combines diverse data points including geo-tagged OOH locations across formats, a traffic measurement study by a global research agency, multiple databases to map and measure the current profiles of resident & transit population and panel rating points and various other site factors with the data on thousands of sites across multiple OOH formats. Each site is geo-tagged and cross-linked with google-map APIs to indicate various relevant points of interest like Banks, Auto showrooms from the site. SHARP is also coded to differentiate between multiple (stacked) billboards at the same location with indicative pricing per site. Alok Jalan, Managing Director, Laqshya Media Group commented: "As an Industry leader, it was but natural that we had to resolve client concerns about the lack of measurement metrics in the OOH Industry. SHARP has been the outcome of months of hard work & is unmatched in its ability to give a scientific rationale for an OOH campaign.

A massive immersion of Data & Technology has been done to generate the right algorithms for Machine learning. In addition, APIs of numerous consumption economy platforms have been integrated with the software to have a dynamic tracking of consumer interest points. While planning marketing budgets for a campaign, OOH usually gets a lower share of the pie; SHARP is set to change this. With better data and targeting, brands will be better assured of return on OOH investment, which in turn has the potential to alter the share of wallet for the medium. Sai Nagesh, Chief Strategy Officer, Laqshya Media said: "SHARP was developed in response to the growing demand by brands who wanted quantification of Results delivered by an OOH campaign. The Software relies on Machine Learning to deliver AI-optimized recommendations for the most effective results in a client defined Target Audience. Allowing clients to identify locations with the highest audience density in order to reduce spill-over, an OOH

SHARP

Strategic Hyper local AI-powered Reach Planner

campaign's Reach and effectiveness is now quantifiable. Apart from providing valuable campaign optimization opportunities, it lists the touch points available within the neighbourhood of an OOH asset as per Google defined touch points available on the Google maps API. The days of gut-feel & assumptions are over!"
